Wellhead Protection

● WELLHEAD PROTECTION

Note: All works must be completed in compliance with Ontario Regulation 903.

Describe the present condition of the well and how it impacts groundwater or well water quality:

Please indicate the steps you will take to upgrade the well:

- installing a pitless adapter to replace drilled well pit
- sealing the space between well and soil
- upgrading or replacing damaged well casing
- extending the well casing to 40cm (16 inches) above the finished ground
- installing proper well head caps
- grading, landscaping and permanently seeding around well to divert water away from well
- other, please describe _____

Estimated cost of the upgrade: _____

(please attach written quotations from Ontario-licenced well contractors)

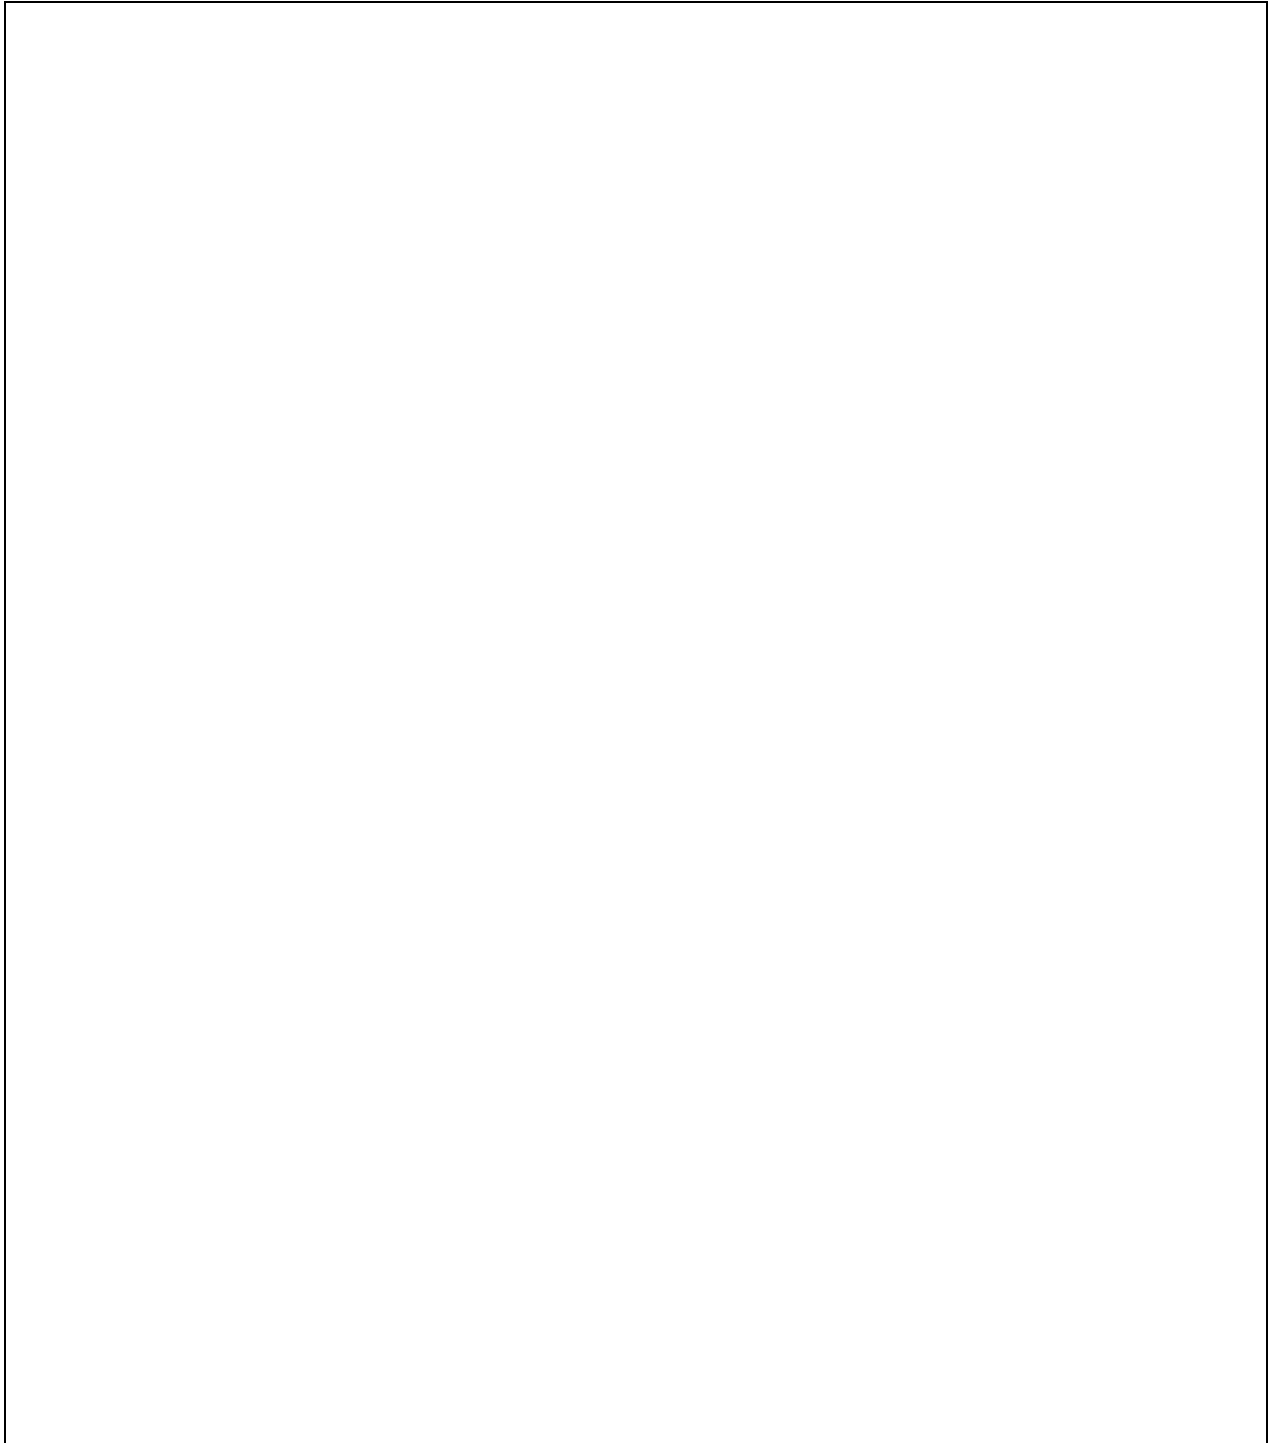

To the best of my knowledge, the information contained herein is accurate

Applicant Name: _____

Signature: _____ Date: _____

• SITE PLAN

Provide a sketch of the proposed project site showing the location of wells and potential sources of contamination such as fuel, chemical and fertilizer storage, manure storage, barnyards and septic systems. Include any other information that you feel is important.

A large, empty rectangular box with a thin black border, intended for a hand-drawn site plan. The box occupies most of the lower half of the page.
