

Can You Camo?

Mammals are all around us, but sometimes they are hard to spot! They are often able to blend in or camouflage with their surroundings, making them almost invisible. One mammal that is really good at blending in is the rabbit! Can you help this rabbit camouflage somewhere in your neighbourhood or home?

Here's how to play:

1. Think about a good hiding place for your rabbit.
2. Cut out the rabbit below or draw your own rabbit shape.
3. Colour or paint your rabbit so that it matches the hiding spot you've selected. You could also add other materials you have like yarn, tissue paper, pom poms, felt or construction paper. Be sure to pay careful attention to the colours and textures in your hiding spot.
4. Hide it in the spot you selected and challenge a family member to find it!
